(using estimated average shelf life at shipping)

Dantrium® IV

(dantrolene sodium for injection)

**The Rapidly Mixing Product —
reconstitutes in 20 seconds!**

- Reconstitutes 4x faster than before
- Easy-to-open flip-off vial cap
- Dantrium® IV has 36 months of shelf life*

*JHP's Dantrium® IV has a 36 months shelf life at manufacturing point compared to generic Dantrolene Sodium for Injection/Revonto™ which only has 24 months shelf life. There is always some lag period between manufacturing date and when the product ships to the end user, which varies based on when the order is placed. Please note that Dantrium® IV shipping now, expires in 2013, allowing you the most savings in the event the product sits in your inventory until it expires.

Safety Information

Management of Malignant Hyperthermia (MH) crises requires various supportive measures individualized for the patient's condition. Administration of Dantrium® IV is one component of therapy and should not be considered a substitute for these measures. Even when properly treated, an MH crisis can result in death. Adverse events with Dantrium® IV include loss of grip strength, weakness in the legs, drowsiness, and dizziness, thrombophlebitis, and tissue necrosis / injection site reactions secondary to extravasation. There have been rare reports of pulmonary edema, urticaria and erythema. Symptomatic hepatitis (fatal and non-fatal) has been reported at various dose levels of the drug. Fatal and non-fatal liver disorders of an idiosyncratic or hypersensitivity type may occur with Dantrium® therapy. In case of overdose, symptoms include, but are not limited to, muscular weakness, lethargy, coma, vomiting, diarrhea, and crystalluria. For acute overdosage, general supportive measures should be employed.

Please see accompanying [full prescribing information](#) for Dantrium® IV.
