

INTRODUCING

REME-SENSE™

DIPOASSIUM OXALATE 3%
TOOTH DESENSITIZER

Rx Only

Now a Complete Algorithm is Available for Desensitizing Teeth

REME-SENSE™ is not limited to a 4-week paradigm. Treatment is initiated in the dental office, then an Rx is written for three months at-home therapy.

REME-SENSE™ contains Dipotassium Oxalate 3% that is clinically proven to provide immediate relief for dentin hypersensitivity lasting up to four weeks¹.

REME-SENSE™ offers the patient:

- Immediate relief after a 10-minute treatment
- A non-abrasive therapy
- An active ingredient embedded in a foam matrix that is released in a sustained and controlled manner²

Important safety information: REME-SENSE™ may cause eye irritation upon contact and is contraindicated in patients with a known allergy to any of the ingredients.
