

# A Pharmacist's Guide to Penicillin Allergy Testing

Join us for a **complimentary one hour webinar** focused on implementing penicillin allergy testing in your hospital.

January 11, 2011 | 8:00 pm EST

or

January 13, 2011 | 1:00 pm EST

In this webinar, learn more about:

- Prevalence of allergy to penicillin and related antibiotics
- The different classifications of drug allergy using the Gell & Coombs classification
- The role of skin testing in patients with suspected beta-Lactam allergies
- Undertaking the penicillin skin testing procedure with PRE-PEN
- Outlining a practical approach for implementing penicillin skin testing
- Using penicillin allergy testing as a component of antimicrobial stewardship

**Presented By:**

Geoffrey C. Wall, RPh, PharmD, FCCP, BCPS, CGP

- Associate Professor, Department of Pharmacy Practice, Drake University
- Clinical Assistant Professor, Department of Pharmacology and Physiology, Des Moines University
- Internal Medicine and Medical Intensive Care Teaching Services at Iowa Methodist Medical Center
- Written a number of peer-reviewed papers and textbook chapters on a variety of topics, and has designed or participated in several clinical trials.
- Research interests include drug treatment of gastrointestinal disorders, including inflammatory bowel disease (IBD), clinical evaluation of drug allergy and rheumatologic disorders.
