

Your customers are looking for effective, convenient  
B<sub>12</sub> maintenance—without the pain of injection.

Soon you will be able to give them new, once-daily CaloMist™ Nasal Spray, the alternative to intramuscular (IM) therapy that

- Rapidly achieves consistent, therapeutically significant serum B12 levels while minimizing serum B12 fluctuations<sup>1\*</sup>
- Is highly preferred versus IM treatment and noted for ease of compliance and acceptability by patients<sup>1\*,2</sup>
- Readily fits into customers' daily routine with convenient administration that lessens the impact of a missed dose<sup>†</sup>

There is no substitute for once-daily CaloMist™.

For more clinical data or an introductory offer, call [1.800.343.6289](tel:18003436289).

\*Results from 25 subjects who had a history of documented vitamin B<sub>12</sub> deficiency and normal serum B<sub>12</sub> levels during IM B<sub>12</sub> replacement.

†When compared with IM B<sub>12</sub> injection, which is dosed once per month.
