

Your customers are looking for effective, convenient
B₁₂ maintenance—without the pain of injection.

Once Daily CaloMist™ Nasal Spray, the alternative to intramuscular (IM) therapy that

- Rapidly achieves consistent, therapeutically significant serum B12 levels while minimizing serum B12 fluctuations^{1*}
- Is highly preferred versus IM treatment and noted for ease of compliance and acceptability by patients^{1*,2}
- Readily fits into customers' daily routine with convenient administration that lessens the impact of a missed dose[†]

There is no substitute for once-daily CaloMist™.

For more clinical data or an introductory offer, call 1.800.343.6289.

For full prescribing information go to www.calomist.com.

*Results from 25 subjects who had a history of documented vitamin B₁₂ deficiency and normal serum B₁₂ levels during IM B₁₂ replacement.

†When compared with IM B₁₂ injection, which is dosed once per month.
