

New
from CORIA™ Laboratories

Cloderm®
(clocortolone pivalate)
Cream, 0.1% *Pump*

Introducing New Cloderm® *Pump*

The *only* mid potency corticosteroid cream available in a simple-to-use pump

- Over \$58MM in mid-potency steroid creams were prescribed by dermatologists in 2006
 - Cloderm® Cream sales in 2007 are expected to double from last year's total—additional growth is forecasted for 2008
 - Metered dosing provides patients with more controlled dispensing
 - Ideal size for pediatric patients and small body areas
 - Will add new SKU to existing 45g and 90g Cloderm® Cream sizes
 - Will expand market with novel delivery system
-
- The most common adverse events with Cloderm® include dryness, irritation, folliculitis, acneiform eruptions, and burning. Cloderm® is contraindicated in patients who are hypersensitive to any of the ingredients of this product. As with all topical corticosteroids, systemic absorption can produce reversible HPA-axis suppression.
