## IMPORTANT SAFETY INFORMATION

### WARNING: AVOID USE IN PREGNANCY

When pregnancy is detected, discontinue Exforge HCT as soon as possible. Drugs that act directly on the renin-angiotensin system can cause injury or death to the developing fetus [see *Warnings and Precautions* (5.1)].

Because of the hydrochlorothiazide component, EXFORGE HCT is contraindicated in patients with anuria or hypersensitivity to other sulfonamide-derived drugs.

To place an order for EXFORGE HCT, please contact your wholesaler. Please see accompanying full Prescribing Information or visit us at [www.exforgehct.com](http://www.exforgehct.com).
