Restore your body's natural rhythm™

✓ No bloating†
✓ No gas†

✓ No cramps†
✓ No urgency

What is MiraLAX®?

MiraLAX (Polyethylene Glycol 3350) is a different kind of OTC laxative that is kind to your body. It is safe and effective** and treats occasional constipation by working with your body to restore its natural rhythm.

MiraLAX is the #1 prescribed laxative – it has been the #1 choice of doctors for years – and MiraLAX is the only prescription laxative in more than 30 years to be made available OTC.

MiraLAX is Different

How Does MiraLAX® Work?

MiraLAX works with your body to relieve constipation. MiraLAX restores your natural rhythm by using the body's own water to gently increase the frequency of bowel movements and to soften the stool so it is easier to pass.

Relief with MiraLAX is a natural, easy and complete bowel movement. As it works it provides more comfort and less straining without uncomfortable side effects. And, importantly, you can control the urge to go.

MiraLAX does not cause bloating, cramps or gas. In fact, MiraLAX actually reduces the cramps and gas that may be caused by constipation.

Professionally Endorsed

In 2005, the American College of Gastroenterology reviewed all of the clinical research in North America for OTC laxatives. MiraLAX is the only OTC laxative that received a "Grade A Recommendation – their highest rating. No wonder MiraLAX is preferred most by doctors.

No Bloating

What Would My Doctor Recommend?

For years now, MiraLAX has been prescribed most by doctors – more than any other laxative – and now it's available without a prescription.

MiraLAX works with your body's natural rhythm to relieve constipation safely, without the harsh side effects of cramps or gas.

No wonder your doctor prefers MiraLAX®!

For constipation, doctors prefer MiraLAX more than any other prescription drug or OTC laxative. Doctors recommend MiraLAX more than fibers, stimulants, stool softeners or mineral oils to relieve constipation.

What do Laxative Users Think?

If you tried other OTC laxatives, then you already know whether they work for you. If you have found a laxative that works, you may still want to give MiraLAX a try.

*It has been shown that laxative users preferred MiraLAX® when compared to their usual laxative.**

How Do I Take MiraLAX®?

MiraLAX is taken once daily. Each bottle has a white dose-measure built into the cap. MiraLAX dissolves easily and completely (no grit) when you stir the powder into any everyday beverage (4-8 oz), such as water, juice, coffee or tea.

*In a 2001 study, 65% of the 74 subjects who compared PEG 3350 to their usual laxative preferred PEG 3350

**Use as directed
