Important Information about Neupro®

Dear Pharmacist,

Schwarz Pharma, a company of the UCB group, will be recalling Neupro® (rotigotine transdermal system) at the end of April 2008. The product will not be available in the United States after this date. However, patients must first be gradually down-titrated with the current supplies available. Neupro® is indicated for the treatment of the signs and symptoms of early-stage idiopathic Parkinson's disease.

The decision to recall is due to the formation of rotigotine crystals in the patches. When the drug crystallizes, less drug is available to be absorbed through the skin. Therefore, the efficacy of the affected product may vary.

We request that you take the following actions in counseling patients:

- 1. Inform or confirm that patients are aware that Neupro will no longer be available in the marketplace after the end of April 2008**
- 2. Inform patients not to stop taking Neupro**
- 3. Contact their physician as soon as possible to initiate down-titration**

It is strongly advised that patients do not abruptly discontinue therapy. Abrupt withdrawal of dopamine agonists has been associated with a syndrome resembling neuroleptic malignant syndrome or akinetic crises.

For your information, we are requesting that physicians take the following actions:

- 1. Do not initiate any new patients on Neupro®**
- 2. Begin down-titrating all patients currently using Neupro® as per the guidelines in the product label** (reduce by 2 mg/24 hours with a dose reduction preferably every other day)

Down-titration should be performed with product that is unaffected or minimally affected as illustrated in picture A. Product as shown in picture B should not be used. (See example pictures and instructions on reverse side).

A "Dear Patient" letter is enclosed; please copy and distribute to patients when filling their prescriptions. This patient letter has also been provided to physicians and patient support organizations and can be downloaded from the Neupro® website www.neupro.com.

UCB will provide additional direction to you regarding the disposition of unused product at the time of recall.

UCB is committed to keeping open lines of communication. Do not hesitate to contact your local representative or to call UCB Medical Information directly at 1-800-477-7877 (option 9) if you have any questions. Information will also be publicly available on the Neupro® website.

Thank you for your understanding and assistance.

Sincerely,

Kathleen Bos, MD
Vice President, U.S. Medical Affairs
UCB, Inc.

A. You may use patches that have this amount of crystals, or less. The exact pattern or location of crystals on a patch may not look exactly like this.

B. Do not use patches that have this amount of crystals. The exact pattern or location of the crystals on a patch may not look exactly like this.
