

HYDRO 40® FOAM with Proderm Technology™... There is no substitute.

There is **no therapeutic equivalent** for HYDRO 40® FOAM listed by drug data sources including First DataBank, Gold Standard, and Medi-Span.

There is no substitute for HYDRO 40® FOAM listed in the Orange Book.

Other urea products tend to be greasy, difficult to spread, leave behind residue, and contain alcohol. If a patient is using a product that has these characteristics, the patient may be noncompliant, causing the treatment to be ineffective. However, by following established guidelines from the data sources listed above, pharmacists can help their patients with compliance, thereby maximizing treatment efficacy.

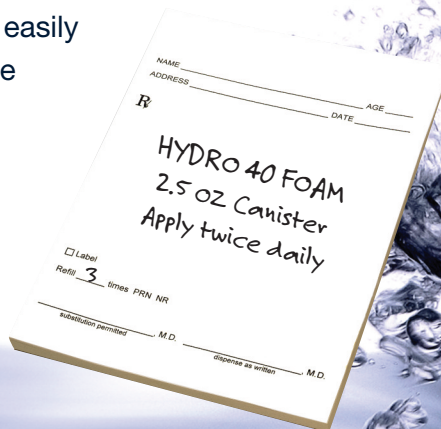

HYDRO 40® FOAM is made with patented Proderm Technology™, a water-lipid-based delivery system that provides the following benefits:

- Restoration of natural skin barrier with physiologic lipids, which is important in treating hyperkeratotic conditions
- Fast absorption of urea 40%
- Non-greasy and spreads easily
- No alcohol and no residue

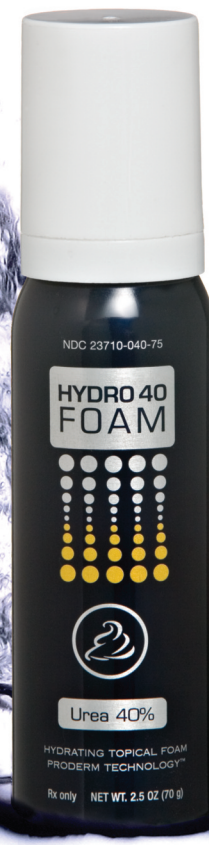

NDC 23710-040-75

- Dispense as written
- No substitution
