

DRUG STORE NEWS

PHARMACY PRACTICE

Now introducing a FREE CE accredited course on:

The treatment and prevention of head lice infestation

By Jennifer Javier, Pharm.D., BCPS, assistant professor of pharmacy practice at Midwestern University—Chicago College of Pharmacy

Universal Program Number: 401-000-08-011-H01

Initial release date: Aug. 1, 2008

Planned expiration date: Aug. 1, 2010

This program is worth two contact hours (0.2 CEUs).

Target Audience

Pharmacists in community-based practice.

Program Goal

To improve the pharmacist's ability to provide consultation for the safe and proper eradication of head lice.

Learning Objectives

Upon completion of this program, the pharmacist should be able to:

1. Describe signs and symptoms indicative of head lice.
2. Describe populations most at risk for head lice and how head lice spread.
3. List OTC and Rx treatments for head lice.
4. Discuss concerns associated with some head lice treatments, including resistance and adverse effects and/or toxicity.
5. Make appropriate recommendations to consumers regarding head lice eradication.

There is no charge for this lesson. To access this lesson and receive grading at no charge, visit www.cedrugstorenews.com and use promotion code **024-08-0011**. If you are a *Drug Store News* enrollee, please use your enrollee number.

A statement of credit will be sent to participants achieving a minimum score of 70 percent correct responses. Statements of credit are issued within seven days of receipt if submitted by mail or fax and immediately if submitted online.

This program is supported by an unrestricted educational grant from:
