GALDERMA
Committed to the future
of dermatology

The most frequent adverse events ($\geq 3\%$) reported in clinical trials were lab test abnormality, urine abnormality, psoriasis, hypercalciuria, pruritus and skin discomfort. Vectical™ should be used with caution in patients with known or suspected disturbances in calcium homeostasis, who are taking calcium or Vitamin D supplements or who are on diuretics. If aberrations in parameters of calcium metabolism occur, discontinue use until

these normalize. Caution patients to avoid excessive exposure to natural or artificial sunlight after applying the ointment. Avoid contact with eyes, lips and face. Limit use to 200 grams per week.

Please see next page for brief summary of Prescribing Information.
