

Critical Therapeutics, Inc. [manufacturer of ZYFLO CR™ (zileuton) extended-release tablets, 600 mg], understands and appreciates the role pharmacists play in the health care continuum. Pharmacists are an integral part of the prescription process, responsible for product recommendations, patient/physician education, counseling, conversions, fulfillment, and most important, compliance.

Critical Therapeutics launched ZYFLO CR on September 27, 2007. ZYFLO CR is an extended-release formulation of the company's ZYFLO® (zileuton) tablets. **Patients taking the original, immediate-release formulation of ZYFLO may prefer the dosing regimen of ZYFLO CR.**

We ask that you make your patients aware of this new formulation, which was launched with the same pricing as the original, immediate-release formulation. ZYFLO CR is promoted in the US by a combined sales force of 240 specialty sales representatives from Critical Therapeutics and DEY. Of course, the patient's doctor must approve the patient's use of all prescriptions, including the use of ZYFLO CR.

Thank you for helping to get the word out about ZYFLO CR.

Below please find the order/item numbers for many of the wholesalers currently stocking ZYFLO and ZYFLO CR.
